FOREWORD

Thanks for purchasing Aputure V-Screen VS-5!

This product is designed for video equipments that offer HDMI ports, and HD-SDI outputs, such as DSLR, and camcorder. And please read the user manual and keep it where all those who use this equipment will read them.

INSTRUCTION

To prevent damage to your product or injury to yourself or to others, read and understand all the following safety precautions before using this equipment.

- Do not disassemble. Touching the product's internal parts could result in injury.
- Use only batteries and charger approved for use in this equipment. Failure to observe this precaution could result in fire or electric shock.
- Turn off immediately in the event of malfunction. Continued operation could result in injury. After removing the battery, take the equipment to an authorized retailer for inspection.
- Do not immerse in or expose to water. Failure to observe this precaution could result in electric shock.
- Remove the battery if you do not use for a long time.
- Do not squeeze or hit the screen. Failure to observe this precaution could result in screen malfunction and injury.
- Do not block its ventilation hole. Do not hinder the heat dissipation, as this could result in deformation or fire.
- Do not use in the presence of flammable gas. Do not use electronic equipment in the presence of flammable gas, as this could result in explosion or fire.
- Do not place the product in the reach of children. Failure to observe this precaution could result in injury.
- The instructions and information in this manual are based on thorough, controlled company testing procedures. Further notice will not be given if the design or specifications change.

FEATURE

Full Info. Mode

In this mode, you can monitor the footage. In the mean time, vectorscope, waveform, RGB histogram, and volume bar are provided to assist shooting.

Waveform

There are two waveform modes: Overlay, and Parade, which allows simple measurement without additional measurement equipment.

Vectorscope

There are two vectorscope modes: 1X, and 2X, which can be used to display color gamut.

Co-Zebra

Utilize both zebra marking and over exposure monitoring features to assist in exposure adjustment.

Peak

You can select Red, Yellow, Blue, or White to highlight the contours of sharpest focusing areas, or choose Highlight to present the focusing area by brightness contrast.

False Color

False Color is used to aid in the setting of camera exposure, which enables proper exposure to be achieved without the use of costly, complicated external test equipment. With the Scale, which is below the image, the user can evaluate the exposure more accurately.

RGB Histogram

The RGB Histogram is a representation of the distribution of colors in an image. It shows the red, green, and blue channels in histogram.

 Mono**Monochrome**

Offer four monochrome patterns, including Grey, Red, Blue and Green.

**Volume Bar**

Monitor the volume in left and right channels. And it is marked by 3 colors, green, yellow, and red, depending the Volume Level.

**Center Mark**

The Center Mark can be displayed together with another marker, Safe Area.

**Safe Area**

A wide range of safe area displays and aspect ratios, 2.35:1/ 1.33:1/ 1.66:1/ 1.85:1/ 70%/ 80%/ 90%, can be selected.

**Flip**

The picture of monitor can be freely flipped both vertically and horizontally.

**Color Temp**

Color Temperatures of 6500K, 9300K or a User preset value can be selected.

**Low Battery Alert**

When your battery power is low, a red battery-shaped signal will flicker on the middle of the screen, which means that the monitor may be shut down in a minute. If so, please replace your battery.

**Shortcut**

When menu is under inactivated, the menu button and navigators, which can be assigned to custom functions, can be use as shortcut keys. Every shortcut keys can be assigned to two function. But when a shortcut key is assigned to zoom, the key can only use as zoom, and can be assigned to all zoom modes.
